- RDMS: Oracle, MySQL

PROFESSIONAL EXPERIENCE

- J P Morgan Chase & Co. [Associate Production Analyst | 2022 May – Present]

Driving Automation, System Optimization, and Application Enhancements for Trading and Investment Operations across APAC, EMEA & NY regions ensuring efficiency and data-driven decision-making. Key Responsibilities:

- Python Automation & Process Optimization: Developed python scripts to enhance email notifications, integrating ETA Tracking, Real-Time feed status, error-handling, and acknowledge features, reducing manual efforts, working with External API's
- Development: Built a web-based productivity tool using Python (Flask, Tornado), HTML, CSS, integrating with API's, Databases, and data-transformations to streamline workflows and improve team efficiency in JPMC Athena Platform.
- Strong Understanding of Software Development Life Cycle (SDLC)
- Cloud & AWS: AWS Practitioner Certified, with hands-on experience in Compute and good understanding of cloud networking components and fundamentals.
- Monitoring & Analytics: Experience with Geneos, Grafana
- Basic Understanding of Micro Services of Kubernetes & Dockers and containers.

EDUCATION QUALIFICATION

- Bachelor in Computer Science and Information Technology
  Madanapalle Institute of Technology & Sciences | Graduated in 2022

PROJECT

- A Fully Python Based Web Application for Students or professionals which give suggestions on placements / offers in which to start their carrier with.

This project is a innovative solution for a generic problem every individual face in their corporate journey, i.e. selecting the best company to start / shift their corporate journey.

Till date the only way people are resolving this dilemma is by their social connections / internet / known groups etc, but there was never a formal and an innovative and mainly trustable way for this.

Yes, you heard it right, we use the Company Financials to determine which is a good company in the market right now and have the capability for future 5 years through their financial statements by comparing with peers.

INTERNSHIPS

- Completed three months Virtual Internship on Devops Tools and SRE with WILEY
